# Algebra 1 with Robots

Projects Created by:

## James Town

Mathematics Specialist at Alameda County Office of Education, Hayward, CA

## Nic McMaster

Mathematics Teacher at Castro Valley High School, Castro Valley, CA

## David Lowry

Mathematics Teacher at Newark Junior High School, Newark, CA

## Ramon Dominguez

Mathematics Teacher at Newark Memorial High School, Newark, CA

## Marco Castro

Mathematics Teacher at Mt. Diablo High School, Concord, CA

## Diedre Baker

Mathematics Instructor at Peralta College, Oakland, CA

Special thanks to our thought partners:

## Celine Liu

Mathematics Specialist at Alameda County Office of Education, Alameda, CA

## Francisco Nieto

EdTech Program Manager at Alameda County Office of Education, Alameda, CA

## Juwen Lam

Professional Expert at Alameda County Office of Education, Alameda, CA

## Sean Ward

Physics, Computer Science, and Mathematics Teacher at Encinal High School, Alameda, CA

Thanks also to our funding partners:
This project was funded by the first round of California Career Pathways Trust grant for the Eastbay Regional Career Pathway Consortium and Alameda County Office of Education.

These projects are designed to support the Algebra I with Computing and Robotics (C-STEM) course that is approved by the UC office of the President to meet the 'c' mathematics requirement. Approved course outline.

If you would like to become a contributor and improve the current projects or add you own to the catalogue, please contact James Town (jtown(a)acoe.org). This is an open source project, it can only get better with your help!

Though this course was written for the Barobo Linkbots in Python or Ch, many (if not all) of the projects can be adapted to work with other classroom robots (Finchbots, Lego NXT, etc). We would be happy to help you translate any of the projects and incorporate adjustments you made so that more teachers and students can benefit from this course. Please contact James Town (jtown(a)acoe.org) for assistance.
